Deploy

Include the config file to get database

```
$include('config.php');
```

Connect to database

```
$mysqli = new mysqli(
    $dbConfig['host'],
    $dbConfig['username'],
    $dbConfig['password'],
    $dbConfig['database']
);
```

// Check connection

```
if ($mysqli->connect_error) {
    die("Error de conexión a la base de datos: " . $mysqli->connect_error);
}
```

// Get total count of tickets

```
$totalCount = 0;
$result = $mysqli->query("SELECT COUNT(*) AS TOTAL FROM tickets");
if ($result) {
    $row = $result->fetch_assoc();
    $totalCount = $row['total'];
    $result->free();
}
```

// Get total amount spent

```
$totalAmount = 0;
$result = $mysqli->query("SELECT SUM(ticket_price) AS TOTAL_AMOUNT FROM tickets");
if ($result) {
    $row = $result->fetch_assoc();
    $totalAmount = $row['total_amount'];
    $result->free();
}
```

// Get average ticket price

```
$averagePrice = 0;
$result = $mysqli->query("SELECT AVG(ticket_price) AS AVG_PRICE FROM tickets");
if ($result) {
    $row = $result->fetch_assoc();
    $averagePrice = $row['avg_price'];
    $result->free();
}
```
